

Web Servant Report December 4, 2011

Northside Area of Narcotics Anonymous

Afternoon everyone, time is starting to zip by and almost caught me off guard as the gray bearded fat man is right around the corner. Our web site is doing great and we are starting to get a lot of traffic. When I find a good hit counter I will install it on our home page at the bottom. I would encourage all of the groups to do something with your group page as I have other group pages making the Google search engines from the Hill Country Area. In fact 2 groups from our area have made the search engines. If your group has questions or would like for me to attend your group conscience let me know. If you have a graphic get it to me and I can make it web ready as I have the computer programs to do this. I have 5 graphics on the images for Google search under the key words "Texas Narcotics Anonymous" on the first page. I would love to make your groups number 6.

The clean date page with the clean date calculator is doing well. I would encourage all members to get me their clean dates and home groups to me so it can be posted. In fact if your home group does a monthly clean time celebration that could go on your group page as well as the clean date page and some pictures of cakes.

I have email addresses set up for the area and this includes group contacts. I will insist that no one use these for personal emails. When this happens we open the door for a lot of spam. In Hill Country we got carried away with Tagged and porno sites. I had to change all of the area email addresses due to this. This is why I use the current email system as it is almost spam proof. If any of you want a personal email address with nascona.org let me know as I have unlimited emails on my server. Example: briefcasebob@nascona.org. All emails are set up in a pop 3 format. I will be willing to help any of you set this up in your computer. This way you can log into the email account and use that email address when you respond to an email from our website or use your computer. It isn't hard and I can set up a tutorial that can walk you through this process in a matter of minutes.
